To whom it may concern,

27 Feb 2011

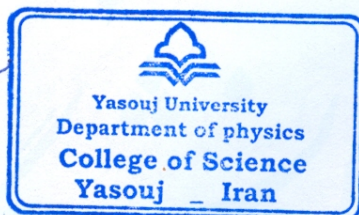

It is a great pleasure to write a letter of recommendation on behalf of Mr. S. N. Doostimotlagh, with whom I have been in close association since undergraduate work at our department.

Mr. Doostimotlagh was a M.Sc student at our department and worked on his research project under supervising Dr. G. Rezaei. The main topic of his project concern "*Study of the diamagnetic susceptibility of the hydrogenic impurity in a Spherical Quantum Dot*". He had three courses in modern quantum mechanics I, II and optics laboratory with me during his B.Sc and M.Sc periods. Its performance in these courses was excellent. I know that he was among the upper 10% of his classmates during B.Sc course and has finished his studies two semesters earlier than others. During his M.Sc course he is completely equipped working with computer especially typing and editing programs such as word and winedit and computational programs such as maple. He has several papers during his studies which are presented in conferences or published in international journals. During my association with Mr. Doostimotlagh I found him to be intellectual, punctual, friendly, cooperative and especially hardworking.

In view of aforementioned points, I am pleased to recommend Mr. Doostimotlagh for participating in your Ph.D position and research activities.

Sincerely Yours,

B. Vaseghi, 
Assistant Prof of Physics,
Head of the Physics Department,
Yasouj University,
Yasouj, Iran,
