&
ASSOCIATE ARCHITECTS

RECOMMENDATION LETTER FOR BACHELORS DEGREE

I have worked with Tseko Malambo for 2 year 6 months, specifically as a principal at Sphinx Associate Architects, providing guidance and support in his early professional career. His duties here included office work on drafting, design, project planning and correspondence, where he showed a growing skill in various CAD technology and professional practice. On out of office duties he participated willingly in supervision on some of our most active projects as well as interacting with local planning authority, taking seriously every opportunity to learn and understand procedures with much enthusiasm to our firms satisfaction.

By and large, he is a fast learner and was extremely eager to learn all he could about each project in the office and apply himself diligently thus i found his interest and commitment to his work most encouraging. He is a focused self motivated individual who worked well with fellow colleagues, working at his best in groups, being able to work efficiently in handling simultaneous deadlines and to produce a consistent high standard of work even under extreme work pressure.

I have the deepest professional respect and sincerely believe he will bring his energy, optimism, passion and creativity to your class and esteemed university. The Postgraduate degree will no doubt boost Tseko's career, giving him the much needed knowledge to face the various challenges in the ever changing world of architecture and project management.

Any assistance that will be rendered to enable Tseko secure a place at your university will be appreciated.

Should you require further information on the applicant, feel free to communicate with me on the contact details provided.

Sincerely,

Sphinx Design & Associate Architects.

J.M. Bwalya. Msc. Arch. M

PRINCIPAL ARCHITECT
