REF: RECOMMENDATION STUDY COURSE LANGUAGE

I have worked with Tseko Malambo for 2 years 6 months, specifically as a mentor, tutor, and as his principal architect at Sphinx Associates. He's duties here included both in and out of office work in which he participated willingly, taking seriously every opportunity to learn and understand procedures with much enthusiasm to our firms satisfaction.

By and large, he is a fast learner and was extremely eager to learn all he could about each project on which we worked and apply himself fully, thus i found his interest and commitment to his work most encouraging. He is a focused self motivated individual who worked well with fellow colleagues working at he's best in groups, being able to work efficiently in handling simultaneous deadlines and to produce a consistent high standard of work even under extreme work pressure.

I have the deepest professional respect and sincerely believe he will bring he's unique energy, optimism, passion and tireless creativity to your class and programme in general. The non degree Chinese Language class will benefit and advantage Tseko's communication skills with the fast growing interaction with China in particular the Chinese investors and local Chinese contractors in he's line of work as well as pursuing any further studies in China itself.

Should you require further information on the applicant, feel free to communicate with me on the contact details provided.
