

Bachelor Program of International Economics and Trade

[Introduction to School of Economics and Management]:

School of Economics & Management of Beihang University (BUAA), originally established in 1956 as a Department of Aeronautic Engineering Economics, is one of the first founded Management Schools among technology and engineering based universities in China. Over the past 50 years, the School has achieved her nationwide prestige in scientific research and training program. With more than 5000 B.S., M.S., and PhD Degree students graduated from the school, the school has been providing excellent and talented management experts and economists in various areas, working industriously for development of aeronautic and astronautic industries as well as other key industries and business sectors in national economy. The school consists of seven Departments: Business Administration, Information System, Management Science and Engineering, International Economics and Trade, Insurance & Risk Management, Finance, and Accounting.

There are four major research centers in the School. 4 laboratories are running at the School. The school also owns one a 350 square meter library with more than 50 international journals in academic and business management fields (English version) and more than 100 domestic published key journals in management and economics. More than 10000 English and Chinese version of professional books are collected in the library. PhD thesis and master degree thesis of the School graduates for past 20 years are also collected in the library.
